

# Step 1 : First vector

Draw the first vector :

- Select the first point
- show the line moving
- Select the second point

After this, we can move the 2 points (circle)

# Step 2 : Second vector

As the first vector, we draw a second one :

- Select the first point
- show the line moving
- Select the second point

After this, we can move the 2 points (circle) of the first and the second vector
